| Subject: Technology                             | Year group: Year 2   | Topic: Materials | Initiation &    |
|---|--|------------------|-----------------|
| Prior knowledge required: Children sa           | fely use and explore a variety of materials, tools and techniques,                     | Vocabulary:      | activation      |
| experimenting with colour, design, tex          | ture, form and function.   |                  | activities:     |
| Programme of Study Years 1 and 2                | Implementation:  | Impact –lesson   | Evaluations and |
|   |  | sequence:        | assessments:    |
| When designing and making, pupils               | Use of materials   |                  |                 |
| should be taught to:                            | <ul> <li>Can they measure materials to use in a model or structure?</li> </ul>         |                  |                 |
| Design  | <ul> <li>Can they join material in different ways?</li> </ul>                          |                  |                 |
| <ul> <li>design purposeful,</li> </ul>          | <ul> <li>Can they use joining, folding or rolling to make it stronger?</li> </ul>      |                  |                 |
| functional, appealing                           | Developing, planning and communicating ideas   |                  |                 |
| products for themselves and                     | <ul> <li>Can they think of ideas and plan what to do next?</li> </ul>                  |                  |                 |
| other users based on design                     | <ul> <li>Can they choose the best tools and materials? Can they give a</li> </ul>      |                  |                 |
| criteria  | reason why these are best?   |                  |                 |
| <ul> <li>generate, develop, model</li> </ul>    | Can they describe their design by using pictures, diagrams, models                     |                  |                 |
| and communicate their ideas                     | and words?   |                  |                 |
| through talking, drawing,                       | Working with tools, equipment, materials and components to make                        |                  |                 |
| templates, mock-ups and,                        | quality products   |                  |                 |
| where appropriate,                              | <ul> <li>Can they join things (materials/ components) together in different</li> </ul> |                  |                 |
| information and                                 | ways?  |                  |                 |
| communication technology                        | Evaluating processes and products  |                  |                 |
| Make  | <ul> <li>Can they explain what went well with their work?</li> </ul>                   |                  |                 |
| <ul> <li>select from and use a range</li> </ul> | <ul> <li>If they did it again, can they explain what they would improve?</li> </ul>    |                  |                 |
| of tools and equipment to                       |  |                  |                 |
| perform practical tasks, (or                    |  |                  |                 |
| example, cutting, shaping,                      |  |                  |                 |
| joining and finishing)                          |  |                  |                 |
| <ul> <li>select from and use a wide</li> </ul>  |  |                  |                 |
| range of materials and                          |  |                  |                 |
| components, including                           |  |                  |                 |
| construction materials,                         |  |                  |                 |
| textiles and ingredients,                       |  |                  |                 |
| according to their                              |  |                  |                 |
| characteristics                                 |  |                  |                 |
| Evaluate  |  |                  |                 |
| explore and evaluate a range                    |  |                  |                 |
| of existing products                            |  |                  |                 |
| <ul> <li>evaluate their ideas and</li> </ul>    |  |                  |                 |
| products against design                         |  |                  |                 |
